

Important Notes

1. **Do not change any file names.**
 2. **Always keep all icons inside the designated folder.**
 3. **Picture size requirements:**
 - Width: **69.83 mm**
 - Height: **82.25 mm**
 - File size: **260 KB**
 - When exporting as PNG, the resolution must be **medium (150 PPI)**.
 4. **Always make a copy of the file before making any changes.**
 5. **Do not modify any code in `index.html` and `index.text`, except for the specific parts mentioned.**
 6. **If the file doesn't work, do not save it. Instead, restart from the original file.**

GitHub Information

- **GitHub is the free domain for the old VCards:**
 - [GitHub Link](#)
 - **Primary email for GitHub:**
 - Email: **luxmetallic13@gmail.com**
 - Password: **Luxmetallic13@gmail.com1234**
 - **Spare email for GitHub:**
 - Email: **Luxstoke@gmail.com**
 - Password: **Lux147258369**
-

HOW TO START A NEW VCARD:

Step 1: Make a Copy

- Copy the `[Business card]` file.
- Rename the copied file with the customer's name.

Step 2: Open the File

- Open the file and navigate to `[index.text]`.

Step 3: Edit the Card Information

- Locate the `<script>` section and add the required customer information.
- If you need to delete or add anything, ensure you edit both:
 - `[function saveContact()]`
 - `[var vCard = 'BEGIN:VCARD']`

 **Important:**

- Only change the designated sections (marked as "ADD" at the beginning).
- Do not delete or modify any symbols (" , | , , , : , \ , > , < , { , }).
- If any symbol is deleted, the file may not work properly.

Step 4: Update Icons & Links

- Navigate to `<body>` `<div>` and update only the designated links.
- To remove an icon, delete its corresponding row.

Step 5: Save the Files

- Save two versions of the file:
 1. `index.text` → **File > Save As (Ctrl + Shift + S)**
 2. `index.html` → **File > Save As (Ctrl + Shift + S)**

Step 6: Upload to GitHub

1. Go to [GitHub](#) and sign in with the primary or spare email.
2. Click the "+" icon or navigate to **Repositories > New Repository**.
3. In the **Repository Name** field, enter the customer's name and create the repository.
4. Under "Quick setup — if you've done this kind of thing before," choose "Uploading an existing file."
5. Drag and drop the following files into the designated area:
 - Icons folder
 - Customer's picture
 - `index.text`
 - `index.html`
6. Click "Commit changes."

Step 7: Publish the VCard

1. Go to **Settings > Pages**.
2. Under **Branch**, change "None" to "Main" and save.
3. Navigate to **Actions** to find the deployment link.
4. Copy the link and share or use it as needed.

Final Check:

- Test the link and save function on both desktop and mobile devices (iOS & Android).

Future Changes & Updates

1. To edit an existing repository:
 - Go to **GitHub > Repositories > Select the Repository**.
 - Navigate to **Code > index.html > Edit** and make the changes.
2. To upload a new image:

- Delete the old image and upload a new one **with the same file name**.

 **If an icon or image doesn't appear:**

- **Check the file name first.**
- **Verify the size and resolution.**
